PROFESSIONAL SUMMARY

Operations and systems professional with 8+ years of experience across process training, geospatial data operations, quality assurance, customer and technical support, documentation, and workflow improvement. Skilled at translating complex policies and business needs into clear SOPs, dashboards, automations, role-based workflows, and practical internal tools. Combines dependable operations execution with hands-on project experience in Google Apps Script, Google Sheets, GoHighLevel, React/Vite, Node.js, Express, MySQL, SQLite, Discord systems, Git/GitHub, Railway, Docker, and Cloudflare Pages, Workers, and D1. Completed the Bookkeeping Zero to Hero Masterclass, adding foundational bookkeeping knowledge and QuickBooks familiarity.

CORE SKILLS & TOOLS

Operations & Quality: Workflow design; process mapping; SOPs; onboarding and training; policy interpretation; QA; data validation; audit support; issue investigation; stakeholder support; continuous improvement

Automation & Reporting: Google Apps Script; Google Sheets; dashboards; trackers; assessments; approvals; recurring workflows; CSV export; reporting; operational analytics

Web & Systems: HTML5; CSS3; JavaScript; React/Vite; Node.js; Express; MySQL; SQLite; JWT; Zod; responsive design; role-based access control

Serverless & Delivery: Cloudflare Pages; Workers; D1; webhooks; signed access; passwordless recovery; analytics; backups; GoHighLevel; Discord; Git/GitHub; Railway; Docker

Bookkeeping & Business Tools: Bookkeeping fundamentals; transaction categorization; income and expense tracking; invoicing and reconciliation concepts; basic financial statements; QuickBooks (foundational familiarity)

PROFESSIONAL EXPERIENCE

Process Trainer | Wipro (supporting Google) | 2023-Present

- Design and deliver onboarding, refresher, and policy-support workflows for geospatial operations; translate Roads & Traffic Law policies into clear guidance, SOPs, assessments, and review standards.
- Build trackers, reports, and Google Apps Script / Google Sheets workflows that improve consistency, visibility, and operational handoff; achieved up to a 90% efficiency gain in a supported assessment and reporting process.
- Perform geospatial data-quality and policy-compliance reviews using Atlas and Calypso, investigate discrepancies, document findings, and support trainees, operations leaders, and quality stakeholders.
- Analyze results to identify recurring risks and knowledge gaps; Train-the-Trainer certified with a 5/5 evaluation for an L&D session.

Geospatial Data Operator | Wipro (supporting Google) | 2022-2023

- Analyzed and validated road, traffic, and speed-limit data against mapping rules, policy standards, and source evidence using proprietary GIS tools.
- Investigated discrepancies, documented findings, and maintained accuracy, consistency, compliance, and reliable downstream handoff.

Customer & Technical Support | Capital One, Verizon & Comcast programs | 2017-2021

- Resolved account, billing, connectivity, service, device, and technical concerns using structured troubleshooting and clear case documentation.
- Followed verification, compliance, quality, and escalation procedures while communicating technical steps and next actions clearly.

SELECTED SYSTEMS & OPERATIONS PROJECTS

Learning Library | Serverless Interactive Learning Platform | Live Portfolio Demo

- Built a Cloudflare Pages, Workers, and D1 platform with 10 interactive guides, registry-driven access, signed browser passes, device limits, timed access, and passwordless recovery.
- Implemented and tested PayMongo test webhook fulfillment, Google test rewarded access, Resend email recovery, Turnstile verification, analytics, backups, emergency pause, and rollback workflows; no real charges or ad revenue are processed.

Tools / Focus: Cloudflare Workers; D1; webhooks; access control; recovery; analytics; QA

PersonalVABot | Local-First VA Operations Platform | Windows Desktop Beta v0.3.12

- Product-directed a multi-client workspace for tasks, projects, attendance/DTR, billing agreements, earnings references, documents, recurring work, reminders, backups, and diagnostics across desktop and Discord interfaces.
- Defined workflow, lifecycle, safety, and data-preservation rules; validated end-to-end scenarios, installer launch, restart persistence, backup/restore, and stable local data behavior.

Tools / Focus: Windows desktop app; Discord; SQLite; workflow design; documentation; QA

MarkHQ Assistant | Production Discord Operations System | Railway

- Built a production workspace for task pipelines, private workspaces, onboarding, request approvals, documentation sync, timers, recurring work, reminders, backups, and health monitoring.
- Deployed with persistent SQLite data, automated backups, readiness/preflight checks, and validated archive, reopen, rename, recovery, smoke, lint, and build workflows.

Tools / Focus: Node.js; Discord; SQLite; Railway; Git/GitHub; release validation

ApplyLang | Complete Discord Career Operations System

- Designed structured workflows for reusable career sources, frozen application snapshots, application records, role-profile detection, truth-safe prompt packages, follow-ups, dashboards, analytics, CSV export, and a resume vault.
- Validated source integrity, persistent records, recovery tools, saved output history, and no-required-paid-AI-API workflows.

Tools / Focus: Node.js; Discord; SQLite; Railway; Docker; workflow design; analytics

LeaveFlow | Role-Based Leave Management Application

- Built and tested a full-stack workflow for employee requests, manager decisions, balances, history, calendars, and administrator user management across three roles.

Tools / Focus: React; Vite; Node.js; Express; MySQL; JWT; Zod; FullCalendar

Internal Automation Systems | Google Apps Script / Google Sheets

- Built a secure assessment and reporting system with analytics and exports that achieved up to a 90% efficiency gain; developed the LILO LIVE dashboard with role-based views, statuses, alerts, snapshots, logs, and a ghost-log correction.

Tools / Focus: Google Apps Script; Google Sheets; dashboards; reporting; workflow automation

GoHighLevel Client Website Rebrand | Responsive Client Implementation | In Progress

- Implementing responsive multi-page foundations, custom navigation, program pages, pricing and FAQ sections, reusable HTML/CSS, mobile-specific layouts, and form/calendar/booking considerations.

Tools / Focus: GoHighLevel; HTML; CSS; responsive QA; Clockify; client coordination

EDUCATION & CERTIFICATIONS

Bachelor of Science in Computer Science | Bicol University

Certifications & Training: Civil Service Examination - Professional Passer; Train the Trainer - Wipro Philippines; Google Cloud GenAI - Level 1; Bookkeeping Zero to Hero Masterclass - completed
