PROFESSIONAL PROFILE

Training Lead at Wipro with 8+ years of experience in operations, process training, quality assurance, geospatial data, and customer/technical support. Also engaged as an independent GoHighLevel & Systems Specialist, delivering responsive client websites, CRM workflows, automation components, and technical QA. Builds practical AI, web, and operational tools with a documentation-first, evidence-led approach.

CORE SKILLS

Operations & Delivery: Process training, SOPs, policy interpretation, QA, reporting, troubleshooting, stakeholder coordination

CRM & Automation: GoHighLevel, forms, calendars, pipelines, workflows, Google Apps Script, Google Sheets, HTML/CSS

Development & Tools: JavaScript, React/Vite, Node.js, SQLite, Git/GitHub, Cloudflare Pages/Workers/D1, CapCut Pro

PROFESSIONAL EXPERIENCE

Wipro | Google operations | 2022–Present

Career progression: Training Lead (2026–Present) • Senior Executive – Trainer (2023–2026) • AA – Production Specialist (2022–2023)

- Delivered onboarding, refresher, and policy-support training; translated complex Roads & Traffic Law guidance into SOPs, assessments, and review standards.
- Developed Google Sheets/Apps Script trackers and reporting workflows; investigated discrepancies and supported data-quality follow-through.
- Earlier validated road, traffic, and speed-limit sign data against mapping policy and source evidence.

Customer & Technical Support | Capital One, Verizon & Comcast programs | 2017–2021

- Resolved account, service, connectivity, device, and billing concerns using structured troubleshooting, documentation, verification, and escalation procedures.

SELECTED CLIENT ENGAGEMENT

Childcare Culture & Co. | GoHighLevel & Systems Specialist | Independent Contractor · 2026

- Built and QA-tested a six-page responsive GoHighLevel website with custom HTML/CSS, navigation, lead-capture forms, booking journeys, and promotional updates.
- Configured CRM fields, pipelines, Community/membership workflows, assessment and cohort onboarding components, notifications, and related technical QA; differentiated tested workflows from draft or unverified lifecycle behavior.
- Delivered three client-approved short-form promotional reels, including captions, pacing, audio, and revision handling.

SELECTED SYSTEMS & PRODUCT WORK

Ask Mark | AI Portfolio Assistant: Built a knowledge-backed assistant with a Cloudflare Worker/D1 backend, moderated workflows, public-facts synchronization, and grounded-answer tests.

MARKVERSE / markbadong.com: Built the live React/Vite portfolio; developing an interactive 3D world with two explorable districts, career stations, and an accessible Professional View (v2 remains local preview).

Luma Home Care | GoHighLevel Demo: Created a home-care funnel linked to CRM capture, custom fields, a pipeline, calendar bookings, and follow-up workflows.

PersonalVABot, MarkHQ & ApplyLang: Designed and tested task, operations, and career-workflow tools spanning local-first and Discord-based systems.

Ledger & Tambayan Royale: Built an invoicing/receipt workflow app with reported early use by one friend, plus experimental arcade and 3D browser-game experiences; product maturity varies.

EDUCATION & CREDENTIALS

BS Computer Science, Bicol University | Civil Service Professional Passer | Wipro Train the Trainer | Google Cloud GenAI Level 1
