PROFESSIONAL SUMMARY

Operations and systems professional with 8+ years of experience across process training, data operations, quality assurance, customer and technical support, documentation, and workflow improvement. Skilled at translating complex policies and business needs into clear SOPs, dashboards, automations, role-based workflows, and practical internal tools. Combines dependable operations execution with hands-on experience in Google Apps Script, Google Sheets, GoHighLevel, React, Node.js, MySQL, Discord systems, Git/GitHub, Railway, and production-oriented QA.

CORE SKILLS & TOOLS

Operations & Quality: Workflow design; process mapping; SOPs; onboarding and training; policy interpretation; data validation; QA; audit support; issue investigation; stakeholder support; continuous improvement

Automation & Reporting: Google Apps Script; Google Sheets automation; dashboards; trackers; assessment systems; approval workflows; CSV export; reporting; operational analytics

Web & Systems: HTML5; CSS3; JavaScript; React/Vite; Node.js; Express; MySQL; SQLite; JWT; REST-style APIs; responsive design; role-based access control

Platforms & Delivery: GoHighLevel; Discord; Google Workspace; Git/GitHub; Railway; Docker; Cloudflare Pages; Clockify; Atlas; Calypso; Canva; Microsoft Office

PROFESSIONAL EXPERIENCE

Process Trainer | Wipro (supporting Google)

2023-Present

- Design and deliver onboarding, refresher, and policy-support workflows for geospatial operations; translate Roads & Traffic Law policies into clear guidance, SOPs, and review standards.
- Build assessments, trackers, reports, and Google Apps Script / Google Sheets workflows that improve consistency, visibility, and operational handoff; achieved up to a 90% efficiency gain in a supported process.
- Perform data-quality and policy-compliance reviews using Atlas and Calypso, investigate discrepancies, document findings, and support trainees, operations leaders, and quality stakeholders.
- Analyze assessment and production results to identify recurring risks, knowledge gaps, and opportunities for process improvement; Train-the-Trainer certified with a 5/5 L&D evaluation.

Geospatial Data Operator | Wipro (supporting Google)

2022-2023

- Analyzed and validated road, traffic, and speed-limit data against mapping rules, policy standards, and source evidence using proprietary GIS tools.
- Investigated data discrepancies, documented findings, and maintained accuracy, consistency, and compliance expectations before handoff.

Customer & Technical Support | Capital One, Verizon, and Comcast programs

2017-2021

- Resolved account, billing, connectivity, service, and technical concerns while following verification, compliance, documentation, and escalation procedures.
- Used structured troubleshooting and clear communication to document actions, explain next steps, and support resolution across financial-services and telecommunications environments.

SELECTED SYSTEMS & OPERATIONS PROJECTS

PersonalVABot | Local-First VA Operations Platform | Windows Desktop Beta

- Product-directed a multi-client workspace for tasks, attendance/DTR, billing agreements, earnings references, documents, recurring work, backups, and diagnostics across desktop and Discord interfaces.
- Defined workflow, lifecycle, safety, and data-preservation rules; validated end-to-end scenarios, installer launch, backup/restore, and stable local data behavior.

Tools: Windows desktop app, Discord, SQLite, workflow design, documentation, QA

MarkHQ Assistant | Production Discord Operations System | Railway

- Built a production workspace for task pipelines, private workspaces, onboarding, request approvals, documentation sync, timers, recurring work, reminders, backups, and health monitoring.
- Deployed with persistent SQLite data, automated backups, readiness/preflight checks, and validated archive, reopen, rename, and recovery workflows.

Tools: Node.js, Discord, SQLite, Railway, Git/GitHub, release validation

LeaveFlow | Role-Based Leave Management Application

- Built a full-stack workflow for employee requests, manager decisions, balances, history, calendars, and administrator user management across three roles.
- Validated authentication, role permissions, request rules, lifecycle actions, responsive layouts, and connected desktop/mobile behavior.

Tools: React, Node.js, Express, MySQL, JWT, FullCalendar, Zod

Internal Automation Systems | Google Apps Script / Google Sheets

- Built a secure assessment and reporting system with taker controls, review, retakes, analytics, relational Sheets data, and exports; achieved up to a 90% efficiency gain in the supported workflow.
- Developed the LILO LIVE operations dashboard with role-based views, production statuses, alerts, snapshots, logs, dynamic limits, and a ghost-log correction.

Tools: Google Apps Script, Google Sheets, dashboards, reporting, workflow automation

GoHighLevel Client Website Rebrand | Client Implementation | In Progress

- Implementing a responsive multi-page website system with custom navigation, program pages, pricing and FAQ sections, reusable HTML/CSS, and mobile-specific layouts.
- Scope includes design translation, form/calendar/booking considerations, iterative QA, documentation, and coordination with the project lead.

Tools: GoHighLevel, HTML, CSS, responsive QA, client coordination

EDUCATION & CERTIFICATIONS

Bachelor of Science in Computer Science | Bicol University

Certifications: Civil Service Examination - Professional Passer; Train the Trainer - Wipro Philippines; Google Cloud GenAI - Level 1
