Video & Content: CapCut Pro; vertical short-form video; clip selection; pacing; captions; highlighted text; voice-over timing; music; sound effects; AI-assisted visuals; revisions and delivery
Web, Systems & Delivery: HTML/CSS/JavaScript; React/Vite; Node.js; Express; MySQL; SQLite; Discord; Git/GitHub; Railway; Docker; Cloudflare Pages/Workers/D1
Productivity Tools: Google Workspace (daily use); Microsoft Office; Canva; Clockify; basic bookkeeping; QuickBooks (foundational familiarity)

PROFESSIONAL EXPERIENCE

Senior Executive - Trainer (Process Trainer) | Wipro, supporting Google | 2023-Present

- Promoted to the B1-band official title Senior Executive - Trainer; designed and delivered onboarding, refresher, and policy-support workflows for geospatial operations.
- Translated complex Roads & Traffic Law policies into clear guidance, SOPs, assessments, and review standards.
- Built trackers, reports, and Google Apps Script / Google Sheets workflows; achieved up to a 90% efficiency gain in a supported assessment and reporting process.
- Performed data-quality reviews, investigated discrepancies, documented findings, and coordinated follow-through with trainees, operations leaders, and quality stakeholders.
- Train-the-Trainer certified with a 5/5 evaluation for an L&D session.

AA - Production Specialist (Geospatial Data Operator) | Wipro, supporting Google | 2022-2023

- Analyzed and validated road, traffic, and speed-limit data against mapping rules, policy standards, and source evidence.
- Investigated discrepancies and maintained accurate, compliant, and reliable downstream handoff.

Customer & Technical Support | Capital One, Verizon & Comcast programs | 2017-2021

- Resolved account, billing, financial-account, service, connectivity, device, and technical concerns using structured troubleshooting and clear case documentation.
- Followed verification, confidentiality, compliance, quality, and escalation procedures while communicating decisions and next steps clearly.

SELECTED CLIENT & OPERATIONS PROJECTS

Childcare Culture & Co. | GoHighLevel Website & Short-Form Content | Live Client Work

- Implemented and refined a responsive six-page GoHighLevel website with custom navigation, branded sections, reusable HTML/CSS, mobile-specific layouts, basic SEO support, and controlled draft-based QA.
- Edited three client-approved vertical promotional reels in CapCut Pro with clip sequencing, captions, highlighted text, music, sound effects, voice-over timing, CTA screens, and revision handling.

Tools / Focus: GoHighLevel; HTML; CSS; responsive QA; CapCut Pro; short-form video; client coordination

Luma Home Care | End-to-End GoHighLevel Funnel & CRM Showcase | Complete

- Built a responsive external funnel and configured custom fields, forms/surveys, calendar booking, pipeline stages, automated follow-ups, and internal notifications.
- Validated that submissions and bookings create the intended contact, opportunity, and workflow activity inside GoHighLevel.

Tools / Focus: GoHighLevel; funnels; CRM; forms; calendars; pipelines; workflows; automation

PersonalVABot | Local-First VA Operations Platform | Windows Desktop Beta v0.3.12

- Product-directed a multi-client workspace for tasks, projects, attendance/DTR, billing references, documents, recurring work, reminders, backups, exports, and diagnostics.
- Defined workflow, safety, archive, and data-preservation rules; validated installer launch, persistence, backup/restore, and stable local data behavior.

Tools / Focus: Windows desktop app; Discord; SQLite; workflow design; documentation; QA

MarkHQ Assistant | Production Discord Operations System | Railway

- Built a production workspace for task pipelines, private workspaces, onboarding, approvals, documentation sync, timers, recurring work, reminders, backups, and health monitoring.
- Deployed with persistent SQLite data, automated backups, readiness/preflight checks, and validated archive, recovery, smoke, lint, and build workflows.

Tools / Focus: Node.js; Discord; SQLite; Railway; Git/GitHub; release validation

Internal Automation Systems | Google Apps Script / Google Sheets

- Built an assessment and reporting system with analytics and exports that achieved up to a 90% efficiency gain; developed the LILO LIVE dashboard with role-based views, statuses, alerts, snapshots, logs, and a ghost-log correction.

Tools / Focus: Google Apps Script; Google Sheets; dashboards; reporting; workflow automation

ApplyLang | Career Operations System | Complete Discord Product

- Designed structured workflows for reusable career sources, application snapshots, role matching, prompt packages, follow-ups, dashboards, analytics, CSV export, and a resume vault.

Tools / Focus: Node.js; Discord; SQLite; Railway; Docker; workflow design; analytics

markbadong.com | Live Portfolio & Case-Study Platform

- Built and deployed a responsive React/Vite portfolio with evidence-led case studies, accessible screenshots, route handling, SEO, structured data, and Git-based releases.

Tools / Focus: React; Vite; JavaScript; CSS; accessibility; SEO; Cloudflare Pages; Git/GitHub
